

At HiReach we strive to offer our customers a complete package, with first class service, the right advice, and the right equipment to solve all your access issues with one call.

The HiReach Difference

We're committed to improving your productivity and profitability, so we operate 24 hours a day, 7 days a week. We conduct site visits, to inspect your access challenge first-hand and offer expert advice on how to best overcome it.

We try to make your life as easy as possible, by catering for last minute deliveries and going the extra mile to keep you safe, profitable and on deadline. Few other EWP hire companies come close to matching our service ethos and most don't even try.

The Right Access Solution

Prior to establishing the company in 1996, the Directors of HiReach acquired decades of combined experience in the EWP and construction industries. During that time, they saw many access hire companies recommending equipment that would probably do the job - simply because they didn't have the knowledge or equipment to deliver the most effective and efficient solution.

We decided our customers deserved better than 'good enough', so over the years we've invested heavily in South East Queensland's biggest and best range of EWP, as well as Scaffolding, Mast Climbers and other specialised equipment, such as our Fleet of Under Bridge Inspection Units so you only ever have to contact one business for all your access hire needs.

Our ability to deliver a complete package, containing all the elements you need to solve your access challenges, saves you time, money, and hassle.

What's more, if we're ever not able to offer the piece of equipment you need - due to heavy bookings or similar circumstances - we won't leave you disappointed.

Instead, we'll find a replacement to get you on site, as quickly as possible.

The Right Advice

Since we've been in the EWP business for so long, our clients come to us for an 'expert' opinion and innovative solutions.

Our team is yet to face an access challenge they haven't been able solve - 'no' is simply not in our vocabulary.

We'll visit you on site or spend time on the phone, really getting to grips with your access challenge - and, since our staff turnover is so low, you can rely on being able to speak with the same, helpful access experts, every time you call.

The Right Training

At HiReach Training we provide practical information and solutions for creating and maintaining safe working environments through our training courses. When we provide you with a boom lift or scissor lift, or any access solution, we can also provide the relevant or accredited EWP training to ensure you operate the machines, with the most comprehensive and up-to-date knowledge possible.

We offer a range of nationally recognised qualifications and units of competency for Working Safely at Heights, Yellow Card, EWP Boom over 11m, Confined Spaces, Forklift, Manual Handling and Operate a Bridge Inspection Unit.

We offer a wide range of options, including training courses, combined courses, and refresher courses, customised and flexible training tailored to your enterprise or industry specific needs, and group training and assessment at your workplace.

We can also provide Verification of Competency (VOC) to assess competency in the operation of High-Risk plant and equipment, to fulfil pre-employment competency checks and contractual arrangements.

Decades of combined experience in the construction and access industries means that industry experts are conducting the training or are on hand to explain difficult concepts or demonstrate plant and equipment. Our training facilities include a working warehouse environment so trainees can use our state-of-the-art equipment, simulating 'real world' outcomes, instilling confidence and promoting correct working practices.

HiReach Rentals can also provide a variety of Training Programs via our sister Company HiReach Training (RTO 40973).
